

ABSTRACT

**Composition in the form of an O/W emulsion containing
waxes, and use thereof in cosmetics**

The invention relates to a composition in the form of an O/W emulsion containing at least one wax and at least one particular amphiphilic polymer, and to the use of the said composition, in particular for caring for, protecting and/or making up body or facial skin, the eyelashes and/or the lips, and/or for haircare.

The composition obtained may be advantageously free of any surfactant conventionally used in O/W emulsions. It has very good stability and also good cosmetic properties.

The composition is especially in the form of a cream or a milk.

The present invention also relates to the uses of the said composition in cosmetics and dermatology, especially to care for, protect and/or make up the skin and/or mucous membranes.
